

01

Technology that supports your mission

Z7 Solutions™ helps state and local government, higher education, K-12 and exceptional student education (ESE) strengthen security, modernize infrastructure and support dependable daily operations.

Core capabilities

- Cyber resilience: security monitoring, endpoint and identity protection, vulnerability management and recovery readiness.
- Co-managed IT: help desk, device lifecycle, patching, infrastructure operations and engineering escalation.
- Cloud and infrastructure: virtual desktops, application delivery, migrations, networking and data protection.
- Private AI and automation: use-case evaluation, access controls and human approval workflows.
- Executive guidance: fractional CTO and CISO support, roadmaps, risk priorities and governance evidence.

Relevant delivery experience

- State agency: rescued a stalled virtual desktop migration, standardized two data centers and clarified recovery ownership. A second phase modernized desktop delivery in the cloud.
- Autism Inspired Academy: replaced reactive support with managed IT, unified sign-on and layered security to support classrooms and enrollment growth.
- Regional water utility authority: modernized virtual desktops and application delivery, with infrastructure support, onsite help desk and executive guidance.

Define the next step

Share your operational challenge, affected systems, timeline and procurement constraints. Scope a focused assessment, modernization project or ongoing support with clear ownership and acceptance evidence.

02

A clear path from requirement to delivery

Define the requirement, delivery responsibilities and acceptance criteria. Z7 Solutions LLC supports public-sector purchasing and vendor review with established contract routes and company records.

Procurement and company information

GSA MAS supports authorized state and local purchasing, subject to program rules, scope and ordering terms. SeaPort NxG supports eligible Navy requirements.
