The Experts in Cloud Computing

Organizations know that using cloud computing is the way forward due to the benefits and ROI cloud brings. However, living in the era of cloud technologies requires different skills that organizations are struggling to fulfill in existing or new job roles.

Cloud is more than an IT solution. It's a company-wide evolution.

No matter where an organization is in a cloud computing initiative, we can help. We understand organizations are in different phases with unique business goals to achieve, which is why we enable companies, teams and individuals to bridge skills gaps and advance their cloud maturity. Our end-to-end training solutions create structured learning paths for executives and IT pros to acquire the knowledge and deep technical skills the technology community needs to maximize cloud solutions.

Cloud computing impacts people, processes and technologies.

Our learning paths are designed for IT personnel who decide, design, secure, deploy, maintain and analyze an organization's cloud solution. They aim to bring organizations up to a similar baseline understanding of cloud computing with vendor neutral and job-role based training courses, then equip you with the knowledge of the vendor landscape to decide which cloud provider matches your business objectives. Learn to create an effective migration strategy before getting started on the specific vendor learning path that will enable your organization to optimize the cloud and maximize ROI.

It doesn't just end with cloud computing training.

Cloud implementations are more than IT projects. Improve business efficiencies using popular methodologies, build secure infrastructure or applications and acquire business skills IT pros need with our comprehensive portfolio of complementary skills.

- DevOps, Agile and ITIL™ Training
- Cybersecurity Training
- Application Development Training
- Analytics & Data Management Training
- Vendor & Project Management Training
- Business Skills Training

Using more than one cloud provider?

85% of enterprises run a multi-cloud environment. The unique solutions each cloud provider offers enables organizations to choose the best option that meet desired business outcomes, yet the complexity of running connected systems requires advanced skills.

Our partnerships with all the major cloud providers allows you to source authorized training from one place - Global Knowledge. We train on:

- Amazon Web Services (AWS)
- Google Cloud Platform (GCP)
- Microsoft Azure
- IBM Bluemix
- Red Hat Openstack & OpenShift
- force.com (Salesforce)
- Cisco Cloud
- VMware vCloud

We Provide Expertise in Critical Business and Technology Topics:

- IT Fundamentals
- IT Management and Best Practices
- Cloud Computing
- Cybersecurity
- Data Management and Analytics
- Enterprise Software
- Infrastructure and Systems
- Software Development

Choose the Delivery Format that Fits Your Needs

We deliver classroom, live online and on-demand training. If you need private training, we can come to a location of your choice. You get the flexibility and convenience to match your learning style, training goals, schedule and budget.

Learn from the Best Subject Matter Experts

- Our instructors are rigorously screened subject matter experts who bring applied knowledge and expertise to the classroom and online with mentoring and community interaction.
- Our instructors represent the best in their fields. We have more CCIE, CCSI, MCSE, MCSA and MCITP instructors and more IBM Master Instructors than any other training provider.

Engage with Custom, Hands-On Labs and Exercises

- We've invested millions of dollars in the best equipment to help you configure and troubleshoot cutting-edge routers, switches, IP phones, and optical and security equipment.
- We enhance authorized courseware with extended custom labs and exercises to maximize hands-on training and dramatically improve your learning experience.
- Our business training courses feature in-class case studies and exercises, so you can immediately practice what you learn.

Train Your Entire Team or Company with Our Worldwide Solutions

- We provide training and professional development in classrooms and company locations in over 100 countries and 11 languages. Our online training can be accessed almost anywhere.
- Customers trust us to deliver timely, consistent and high-quality training solutions and learning services to individuals, teams and a globally dispersed workforce.
