GOSECURE

GoSecure is the first and only cybersecurity service provider to integrate endpoint, network and email into a comprehensive cloud-delivered Managed Detection and Response service. Based on the CounterTack Platform, GoSecure MDR combines multi-vector visibility, detection, prevention, and response, to counter the most advanced threats. GoSecure also provides a full suite of advisory services backed by one of the industry's largest and most experienced teams of cross-functional security personnel. GoSecure protects you today and helps you understand your risk for better protection tomorrow.

MANAGED DETECTION AND RESPONSE

GoSecure Managed Detection and Response helps all organizations reduce dwell time by preventing breaches before they happen. GoSecure MDR offers a market-leading portfolio of modular detection and response capabilities, delivered as a cloud service, to protect critical data and assets. Our MDR services are driven by aggressive SLAs for rapid response and active mitigation services that directly touch the customers' network and endpoints. These capabilities provide the most effective response to the increased sophistication of continuously evolving malware and malicious insiders that target people, processes and systems.

Next-Generation Antivirus

Replace legacy antivirus solutions with the latest endpoint anti-malware technology to address emerging, fileless, memory-based attacks and more.

Endpoint Detection & Response

Leverage cutting edge threat hunting and machine learning to continuously monitor and observe all aspects of endpoint activity to mitigate attacks before they happen.

Network Detection & Response

Proactively monitor and detect unwanted network activity to identify and mitigate network compromises and internal attacks.

Inbox Detection & Response

Stop phishing and ransomware attacks in the email inbox before they ever reach the endpoint.

Insider Threat Detection & Response

Detect and eliminate malicious and unwanted behavior by employees and administrators to secure data and protect business reputation.

ADVISORY SERVICES

GoSecure Advisory Services helps organizations understand their cybersecurity maturity and risk, working closely with security teams to define a security roadmap that best fits their situation, needs and budget to improve their security posture.

Ethical Hacking

Penetration testing, red and blue teaming, application testing – GoSecure Advisory Services offers a full complement of ethical hacking service. From testing airplane security to nuclear generation sites to helping law enforcement agencies, we have the experience and security credentials needed to tackle your most sensitive and complex projects.

Cybersecurity Assessments

The Cybersecurity Assessment service provides an independent analysis of your security capabilities, how security technology, processes and personnel are being used and how to dramatically increase effectiveness and efficiency. Using our unique Top-Down and Bottom-Up methodology, our Architecture Team reviews security configurations, policies and controls while our Ethical Hacking team test adherence with applied policies and technology controls.

Security Compromise Assessments

Concerned you might currently be, or previously been, breached? Wondering what types of suspicious activity are active on your network? The GoSecure Security Compromise Assessment can help you get the answers to these, and many more, questions. Our team of experienced threat hunters identify the hidden threats, and advanced adversaries, that have breached your IT infrastructure as well as providing guidance and recommendations for mitigation.

Incident Response and Forensics

When a breach occurs, fast and effective response is required. GoSecure Incident Response and Forensics consulting services can be everything from your first responder to the forensics team. Self-service to full-service, GoSecure is ready to help in your time of cybersecurity emergency.
