

Here's why you should invest in an MDM solution

Admins and employees agree mobile devices improve productivity

91% Repetitive, manual admin tasks that take up of IT admins believe mobile devices are critical to the smooth functioning of their organization.*

62% of employees think mobile devices play an important role in keeping them productive at work.†

However, without the right tool, enterprise mobile devices can result in:

 Repetitive, manual admin tasks that take up a lot of time.

 Vulnerable devices exposing corporate data to security threats.

 Decreased productivity due to data unavailability and device downtime.

 Lost or stolen devices that hold sensitive corporate information.

With a device management tool like Mobile Device Manager Plus, you can:

Automate MDM tasks

Maintain security compliance

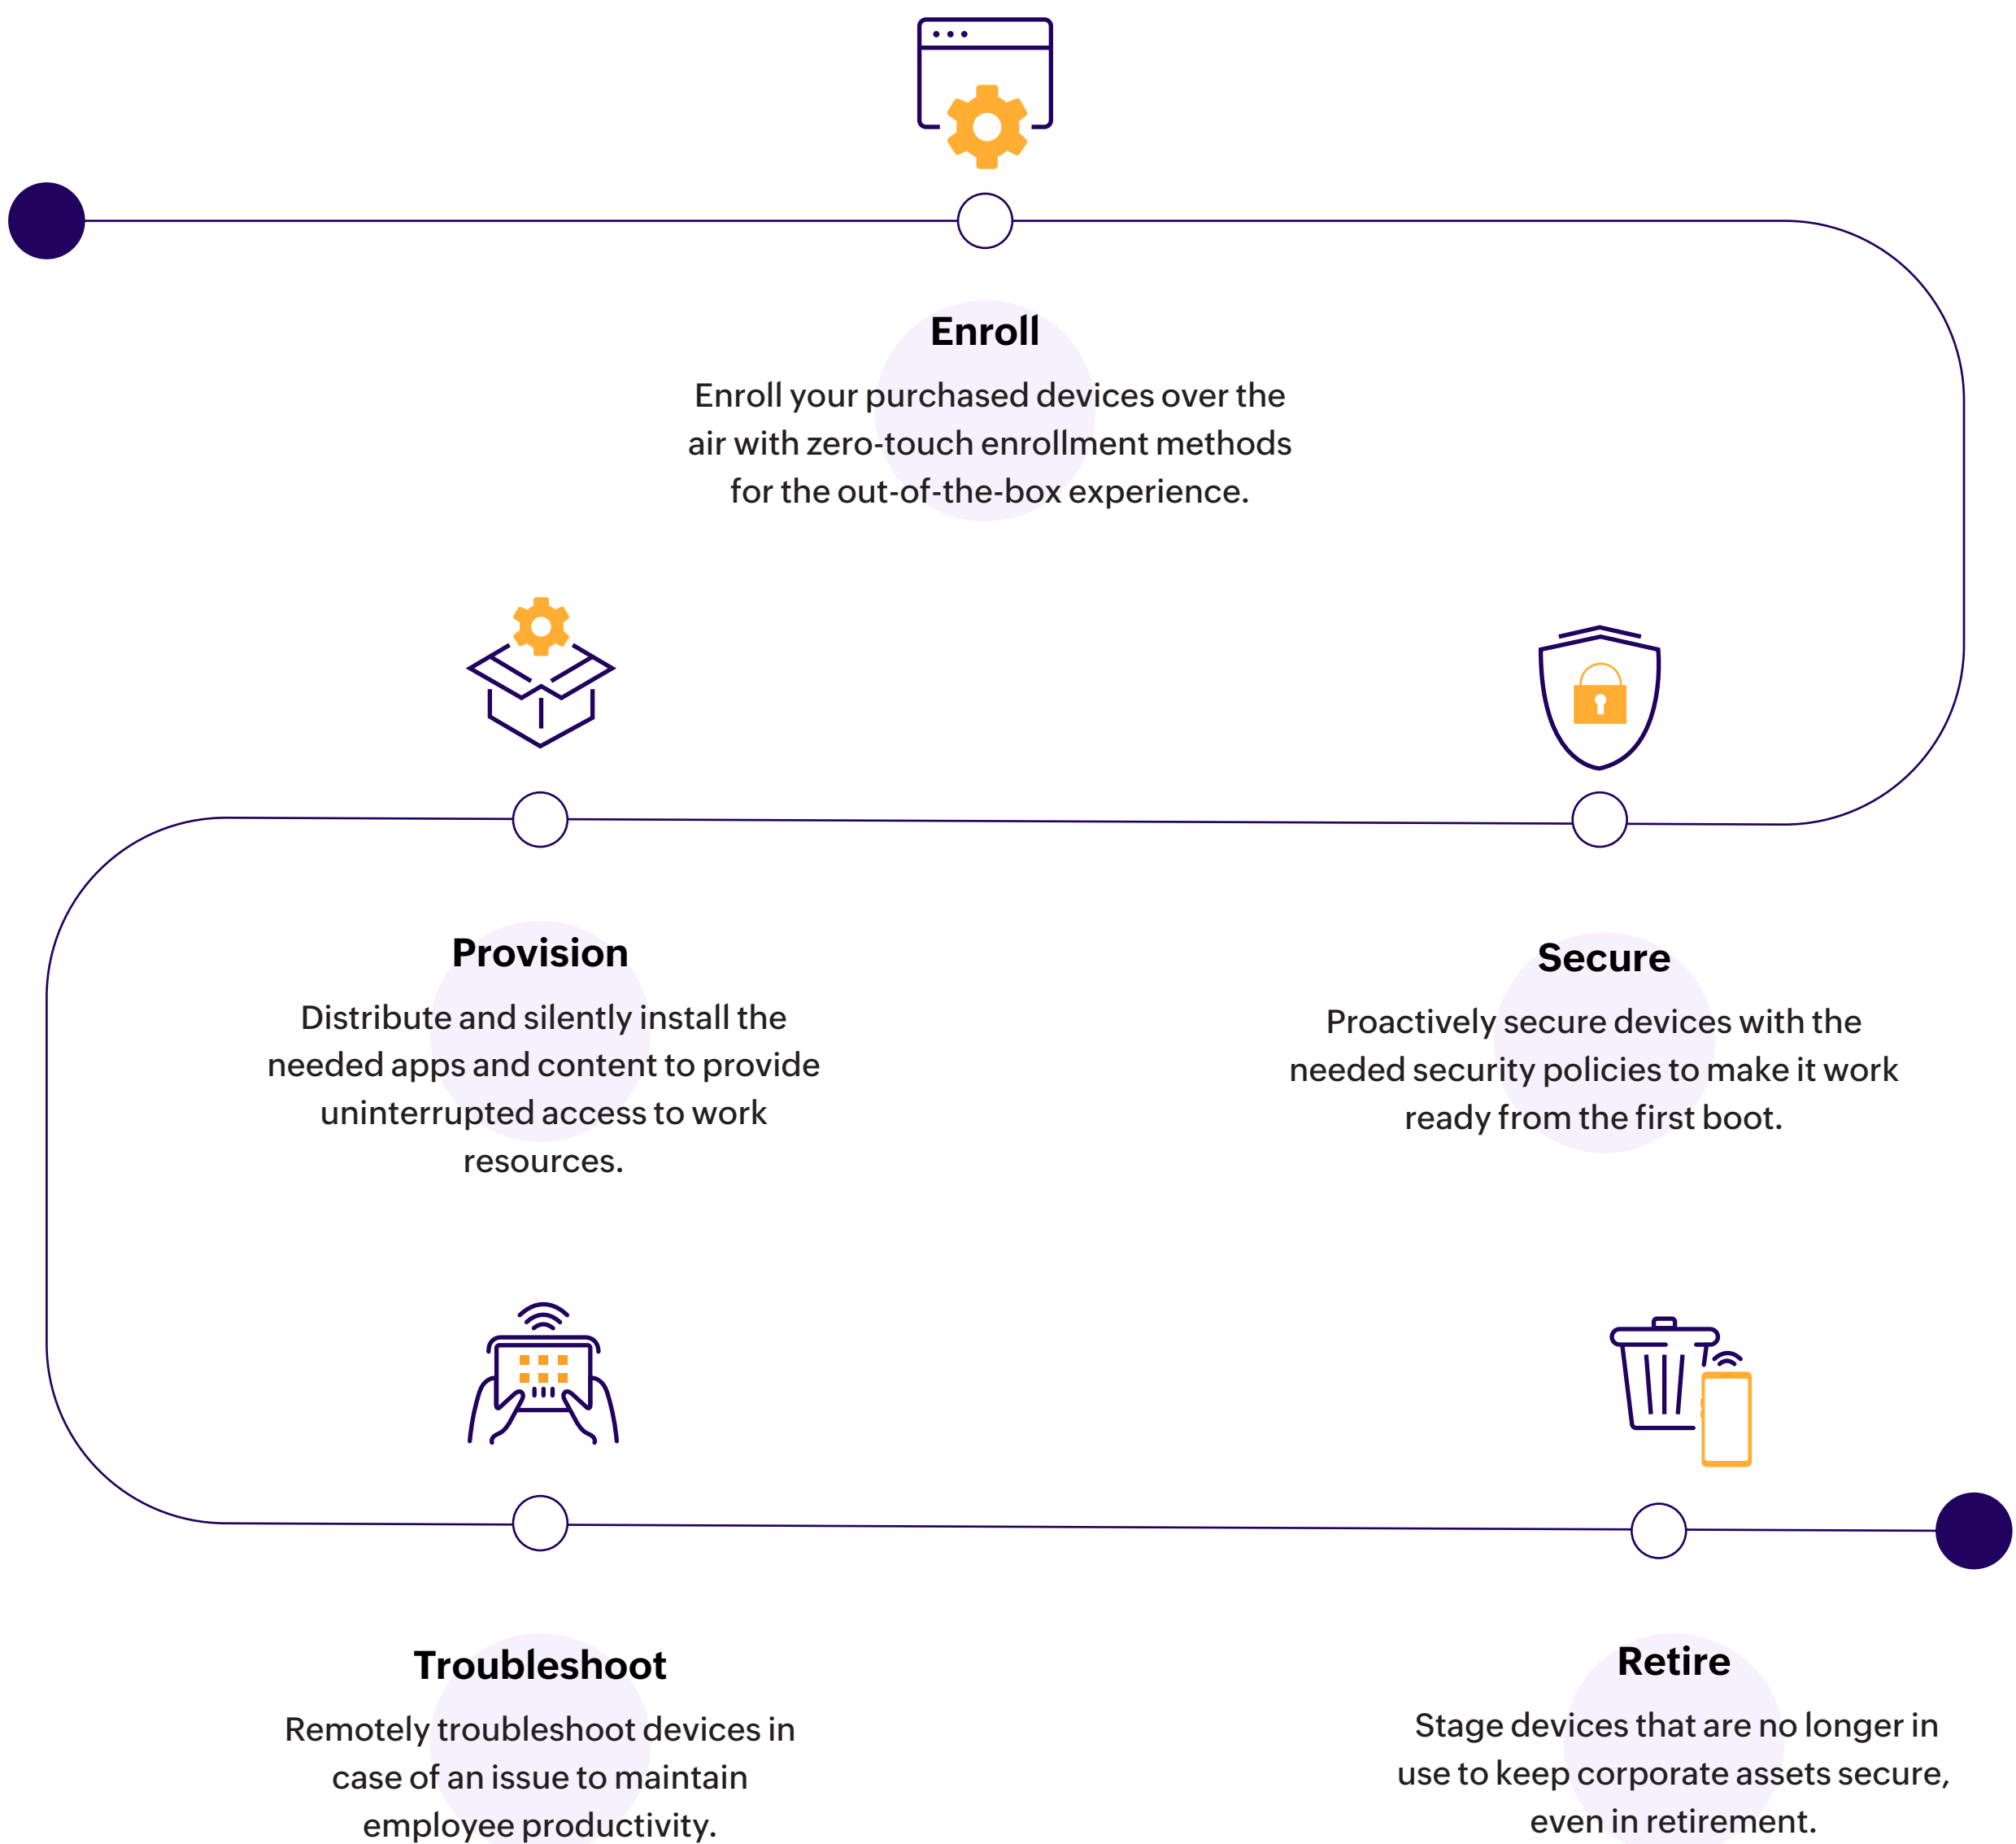

Keep work devices up and running

Remotely manage mobile assets

A complete MDM tool like Mobile Device Manager Plus can help you get the best out of your enterprise mobile devices.

Take care of the entire endpoint life cycle with Mobile Device Manager Plus
